ABOUT LEHI CITY

AS UTAH'S SIXTH OLDEST CITY, LEHI IS RICH IN PIONEER AND OLD WEST HISTORY.

Originally settled by Mormon pioneers, Lehi has been known as Sulphur Springs, Snow's Springs, Dry Creek, and Evansville. It was incorporated as Lehi City in 1852. The Overland Stagecoach Route, the Pony Express Trail, and the Transcontinental Telegraph all passed through or near Lehi during the peak of their use.

Today, the City offers abundant opportunities to live and play. Lehi is the fifth fastest-growing city in the country, with a population of nearly 55,000. As the gateway to Utah County, Lehi is surrounded by Utah Lake and the Oquirrh and Wasatch Mountain ranges. Residents and visitors have easy access to hiking, camping, fishing, mountain biking, and a variety of other outdoor activities.

Lehi operates under the six-member council form of government. The Mayor and five City Council members are each elected at large to serve four-year staggered terms as the legislative council. The City Council is responsible for policy-making decisions while the city administration is responsible for the daily operation of city departments and services.

The City is quickly becoming a premier commercial center along the Wasatch Front. Several landmark companies like Adobe, Microsoft, Xactware, Vivint, Xango, and IM Flash call Lehi home. In fact, Forbes Magazine recently recognized the Lehi area as the best mid-sized area for jobs (2013).

Indeed, Lehi City is pioneering Utah's future!

ELECTED OFFICIALS

AS OFFICIALS ELECTED TO FOUR-YEAR TERMS, THE MAYOR AND CITY COUNCIL AIM TO ENHANCE THE HEALTH, SAFETY, AND WELFARE OF EACH PERSON WITHIN THE COMMUNITY.

WATER SHORTAGE MANAGEMENT PLAN

The Lehi City Water Division regularly monitors the level of city water sources. At the beginning of each month during the peak water usage season (June, July, August, and September), the Lehi City Water Division will use data collected internally, as well as data provided from external sources like the Provo River Water Users Association, to determine the drought conditions in Lehi City. Based on the level of water, the Water Division will determine which water shortage phase will be implemented for that month.

WATER SHORTAGE PHASES

The level and severity of water shortage has been categorized into three phases according to the level of water available. Each phase is labeled with a color to better illustrate when a respective phase is in effect. The three phases with their respective color are:

Phase I	Phase II	Phase III
Normal Conditions	Moderate Shortage	Severe Shortage
75-100% Capacity	50-74% Capacity	Below 50% Capacity

Lehi City water users will be informed of which phase is in effect. Each phase includes voluntary and/or required conservation actions to provide clear guidance to water users on how to respond to water shortages. The table below provides detail on when action is required for each phase of the management plan.

	Phase I	Phase II	Phase III
Lawn Watering	Voluntary	Mandatory	Mandatory
Hard-Surface Washing	Voluntary	Mandatory	Mandatory
Swimming Pools	Voluntary	Voluntary	Mandatory
Outdoor Fountains & Ponds	Voluntary	Voluntary	Mandatory
Washing Personal Vehicles	Voluntary	Voluntary	Mandatory

During Phase II and Phase III of the Management Plan, lawn watering is restricted according to city or county street address.

Phase II Lawn Watering Restrictions: Sprinkler irrigation is prohibited between 10 a.m. and 6 p.m. and limited to three days a week.

- Odd-numbered addresses: Monday, Wednesday, Friday
- Even-numbered addresses: Tuesday, Thursday, Saturday
- Spot-watering on Sunday

Phase III Lawn Watering Restrictions:

Sprinkler irrigation is prohibited between 10 a.m. and 6 p.m. and limited to two days a week.

- Odd-numbered addresses: Monday and Friday
- Even-number addresses: Tuesday and Saturday
- Spot-watering on Sunday

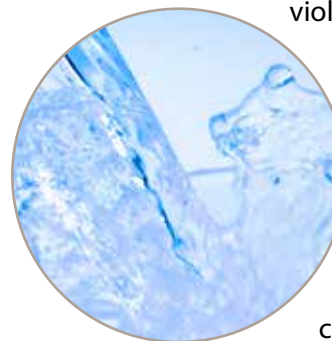

Exceptions are made for new lawns that require frequent irrigation within 30 days for establishment purposes. Exceptions are also made for short cycles required for testing, inspecting, and maintaining irrigation systems. A complete description of conservation actions can be found online at

www.lehi-ut.gov/resources/city-services/sewer-water.

ENFORCEMENT STRATEGY

In order to conserve water in times of water shortage and ensure that Lehi City can provide fire protection to its residents and businesses, the City has established a progressive enforcement strategy. Enforcement measures are intended to educate water users about proper water conservation and reserves punitive action for repeat violators.

The complete Secondary Water System Conservation ordinance, including specific information on mandatory conservation efforts, can be found in the municipal code, Chapter 13.28. Visit www.lehi-ut.gov/government/municipal-code for more information. If you have questions, please contact the Water Division at (385) 201-1900.

STREETS DIVISION

Lehi Streets Division works throughout the year to maintain and improve City streets in order to provide safe vehicular and pedestrian travel.

SNOW REMOVAL

Snow removal crews will make every possible effort to keep major streets clear of snow and ice. Response time depends on the severity and duration of a storm. Roads with the most traffic receive top priority, followed by residential areas. Subdivisions, cul-de-sac, and end streets will be plowed after four or more inches of snow have accumulated.

WINTER PARKING REGULATIONS

City ordinance prohibits parking on the street during a storm and for 24 hours following a storm. Violating the ordinance may result in a parking citation. During a storm removal emergency, as declared by the city administrator, vehicles impeding snow may be impounded.

What to Remember During a Storm

- Property owners are responsible for clearing driveway openings, sidewalks adjacent to their property, and area around fire hydrants.
- Shoveling, plowing, or blowing snow into the street is prohibited by city ordinance.
- To ensure regular mail delivery, clear snow around your mailbox.
- Install mailboxes appropriately to withstand snow removal efforts.
- City rights-of-way for snow storage extends nine feet from the curb. Landscaping and personal property within the rights-of-way is installed at the property owner's risk.

Lehi City's *Power On Program* helps the power department better serve you during an outage. Register your contact information with the City in order to get your power turned on faster.
