MEGA MACHINE ROBOTICS

Session 1: Foundational Engineering: Machines & Contraptions

Does your little learner love to tinker and create new things, or are they the kind of learner who likes to break things apart to see what's inside? If so, they're going to love Snapology's Foundational Engineering: Machines and Contraptions program! This program gives your student the tools they need to understand mechanical movement and the importance of simple machines. They will see these moving parts up-close as they follow instructions to build various machines and contraptions, then use the models to develop new design ideas, test out physics concepts, and even play games with their partners and classmates. Whether they are the creative-constructive type or prefer the inquisitive-deconstructive way of learning, this program is sure to spark their engineering interests!

Session 2: Developing Engineers

Is your student inquisitive, a problem-solver, a big-thinker, a tinkerer, a puzzler, a LEGO® lover, or a budding engineer? If so, they're the perfect fit for Snapology's Developing Engineers: Mechanical Materminds program! This program gives your student the tools they need to understand mechanical movement through the foundations of simple machines, physics, and engineering design. They will see moving parts up-close as they follow instructions to build various machines, then use the models to develop new design ideas, test out physics concepts, and even play games with their partners and classmates. Whether they are the creative-constructive type or prefer the inquisitive-deconstructive way of learning, this program is sure to spark their interests!

REGISTRATION

Registration starts August 1, 2021
Register at the Legacy Center Registration Office during normal business hours or online at www.lehi-ut.gov/legacy-center.

Registration is non-refundable and non-transferable. Space is limited so register today.
